ABOUT ME

I am an enthusiastic Software Developer skilled in PHP, Laravel, Vue.js, MySQL, cPanel, Git, and GitHub. I specialize in building efficient, scalable web applications that enhance performance and user experience. I am aiming to contribute to organizational success while growing both personally and professionally.

EDUCATION

BSc in Computer Science & Engineering
International University of Business Agriculture & Technology
📅 2018 - 2023

EXPERIENCE

Junior Laravel Developer
SoftCrafty

📅 **July 2025 - Present**

- Developed websites and web-based applications
- Collaborated with cross-functional teams (designers, project managers and clients) to translate business requirements into technical specifications

Junior Laravel Developer
Nogor Solutions Limited

📅 **February 2024 - May 2025**

- Developed the CSIFD platform (Customized Software for Development) using Laravel, MySQL, Vue.js, and Bootstrap to accelerate web application development.
- Managed team collaboration, code review, and bug fixing, ensuring high code quality and smooth project delivery.
- I also contributed to the design and development of ERP solutions and custom web applications tailored to client requirements.

SKILLS

- PHP
- LARAVEL
- JAVASCRIPT
- VUE JS
- REACT
- RESTFUL API
- MYSQL
- GIT
- GITHUB

PROJECTS

- AOSED Website (Converted existing static site to a dynamic application)
- AOSED HRM Software (Implemented user authentication, employee, leave, and document management modules)
- Nogor Grocery (Built e-commerce features including product management, shopping cart, user profiles, and sales reporting)
- AOSED Survey Software (Developed survey system with project, indicator, goal, beneficiary management, and JWT-secured REST API)
